

# Chlorine Geni™

The Chlorine Geni: the ultimate chlorine generator

***Enjoy A Healthy, Hassle Free,  
Crystal Clear, Pool...***

**The Chlorine Geni**

Save as much as  
**\$50.00**  
off your monthly  
electricity bill!

by  
reducing your  
pool's filtration time.

**5 YEAR  
FACTORY  
WARRANTY**

***Manufactured by Tucker Products, Inc.***

*Patent Pending*

## The Chlorine Geni...

is the only unit of its kind. It produces chlorine from common rock salt. The salt is added to the unit not your pool. The Chlorine Geni works independently from your filtering equipment and uses about the same amount of electricity as an ordinary light bulb. This easy to use unit automatically feeds the chlorine into your pool every day.

The Chlorine Geni puts the FUN back into owning your pool!

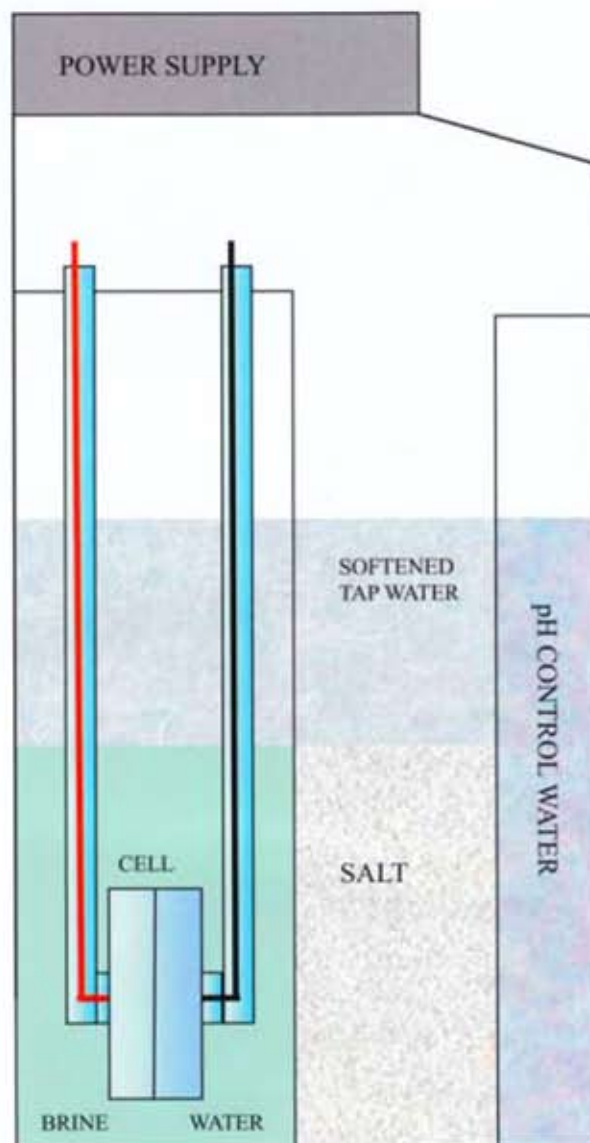

### Benefits of the Chlorine Geni

- Safe pool water 365 days a year!
- Water always crystal clear!
- Eliminates the liability of handling, transporting and storing of hazardous sanitizing chemicals!
- Controls pH with a manual control valve!
- Water feels softer and more comfortable!
- No more clothing ruined from pool chlorine!
- Extends life of pool and equipment!
- Reduces skin irritation, red eyes and green hair!
- Can maintain a higher chlorine reading without irritation caused by commercial chlorine!
- Comes with a five-year warranty!

## How It Works

**Uses less energy than a single light bulb!**

Just like magic, the CHLORINE GENI uses an electrolytic cell submerged in salt water and less electricity than a light bulb to break the salt and water into its basic elements: chloride and sodium ions. The chloride ions combine to make pure chlorine which is then mixed with water and dispensed into your pool every day of the year.

## JUNK

Pure chlorine is a gas and very unstable. When manufactured commercially, all kinds of fillers and binders (stabilizers) have to be added to give shelf life. The chlorine compounds you buy can be up to 95% inert ingredients (junk). This JUNK remains in the pool after the chlorine dissipates. This JUNK is not pool or swimmer "friendly", often causing irritation of eyes and mucus membranes, green hair, itchy dry skin and faded swimwear.

## ENVIRONMENTALLY BAD

Much energy is wasted manufacturing, transporting and delivering sanitizing products to the pool. Chlorine leaks, accidents and salt water pools cause havoc on the environment.

## DANGEROUS & POISONOUS

Handling, transporting & storing chemicals with a "skull & crossbones" sign or the words "dangerous" or "hazardous" creates a liability in your car and at your home. Just reading the labels on these products is scary.

## SOLUTION

With your **CHLORINE GENI**, no "JUNK" is added to your pool; it's environmentally friendly and safe. (Storing a bag of salt is not dangerous.) **The Chlorine Geni** manufactures pool chemicals from salt stored in the unit and dispenses them into your pool every day. **It is the best, easiest, safest and most economical way to sanitize your pool water.**

### THE SALT WATER POOL SYSTEM:

1. 300-600 lbs. of salt is poured into the pool.
2. Filter MUST run to generate and dispense chlorine to the pool.
3. Extra acid is required to lower pH. (Sodium hydroxide, an alkaline by-product, is created and dispensed to the pool.)
4. Minerals attach to the inline cell; cells have to be removed and cleaned regularly. Cells usually have to be replaced every 3 to 5 years at a cost of several hundred dollars.
5. Spa gets over-chlorinated when heating.
6. Salt-water pools harm the environment and are not legal in some cities.

(See: [www.lacsd.org/chlorine](http://www.lacsd.org/chlorine))

### THE CHLORINE GENI UNIT:

1. Salt is added to the unit not the pool water.
2. Runs INDEPENDENTLY from the filtering system: large electrical savings.
3. pH valve allows user to maintain pH without adding acid.
4. Less maintenance: Cells are long lasting and easily cleaned by pushing a button.
  - Household water, not pool water, is used in the Chlorine Geni (less hardness mineral).
  - A reverse osmosis system removes water hardness before it enters the brine tank.
5. Spa is not over-chlorinated when heating.
6. Putting the salt into the unit instead of the pool makes the Chlorine Geni free from salt-water pool regulations. This unique unit is environmentally friendly in many ways.

**In comparison, it's easy to see why the Chlorine Geni is "Head and Shoulders" above the inline salt water pool units.**

## Here's what some owners have to say...

"I constantly receive compliments on how clean my pool water looks, and I contribute the sparkling water to The Chlorine Geni. I would recommend the unit to anyone seeking any of the following: 1. Consistent chlorine/pH levels. 2. Low pool maintenance costs. 3. Easy pool care. 4. Minimal time to invest into pool maintenance." *D. S. of Fresno, California*

"We had been fighting a losing battle for the last several years against algae in our pool. It was costing us around \$100 for chemicals each time the water started turning green... and this was several times a year. It's been almost a year now since we've been using The Chlorine Geni and all we have to put up with is beautiful, crystal-clear blue water... You've made life a lot easier for us and we certainly recommend The Chlorine Geni... it's worth every cent we paid for it." *D. & G. H. of Antioch, California*

"Our Grandson has always had skin problems and irritation after swimming in our pool. We had The Chlorine Geni installed, and he can now enjoy swimming, and no longer has any discomfort or irritation. The Chlorine Geni also made pool care so convenient that I no longer have to think about it." *L. S. of Visalia, California*

"Thanks for introducing me to The Chlorine Geni. It is everything you said it was - cost effective, low maintenance, dependable and easy to operate. I had looked at other chlorine makers, but I am glad I chose The Chlorine Geni." *J. H. of Visalia, California*

"This summer we really enjoyed our pool and it was maintenance free, no adding chlorine... no shocking the pool... no pellets in the pool strainer... Thank you for the special offer - your service is outstanding - the pool maintenance, and the savings; it cannot be beaten." *L. & D. C. of Tulare, California*

"Having this unit does cut down on money, time and energy. You guys have made it so easy to take care of a swimming pool... I had to constantly add tablets of chlorine and make sure the pH balance was correct. Now all I do is check the water, press a few buttons on the unit, and the rest is done for me." *J. J. H. of Fresno, California*

"My husband was so reluctant to get the Chlorine Geni because he just thought it sounded too good to be true! After several years of use it is still working great - saving us money & time - we love our Chlorine Geni!" *R. & L. of Bakersfield, California*

“Two weeks ago, with summer on its way, I decided to “get ready” for the summer swim season. I removed the blanket - checked the chemistry - and was amazed (and delighted) to observe the water chemistry was “perfect” - just as I had left it last October... No more shock treatments - algae killers - and the host of other treatments I have experienced every previous spring. The difference was obviously your “Chlorine Geni”.”  
*D. O. N. of Atherton, California*
